DETAILED ACTION

The Examiner acknowledges the response filed April 3, 2009, wherein claims 3-9, 11-17, 19-28, and 30 are pending.

Claim Objections

Claims 3, 17, and 22 are objected to because of the following informalities: applicant should avoid using pronouns in claims. More specifically the pronoun "its" is narrative, potentially ambiguous, and should be removed from the claims. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 3-9, 11-17, 19-28, and 30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. An added limitation claim 3 states, "wherein said messages begin being automatically generated by the microcontroller unit on its own and without any outside input and prior to any use of said medical apparatus by the user for the current session." Claims 17 and 22 add equivalent

limitations. Dependent claims are rejected because they are dependent on a rejected claim.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
